

Assignment 3(Lab8) PL/SQL: 5marks , Deadline March 19

Assignment3- For this assignment, you only need one instance of Oracle (use installed Oracle 11g+ on your laptop or school oracle.scs.ryerson.ca).

You can look at the following link to learn the fundamental of PL/SQL:
<https://w3resource.com/plsql-exercises/>

Use the following examples and create and populate two new Professors Table with the following attributes:

- 1- Create Professor1 Table
- 2- Create Professor2 Table
- 3- Add an attribute to show the number of courses a professor teaches in the professor tables and then use PL/SQL and write a procedure to move a course from one professor to the other one. For example suppose you want to move the courses of Prof A to Prof B: you can do that by reducing the number of courses of Prof A and increasing the number of courses of the second professor (Prof B).
